Real Data Sources, Filtering, and AI

1. News

Data will come from these links:

- UN News: https://news.un.org/
- Reuters: https://www.reuters.com/
- BBC News: https://www.bbc.com/news
- Al Jazeera: https://www.aljazeera.com/
- Rwanda Government: https://www.gov.rw/
- ReliefWeb: https://reliefweb.int/
- World Health Organization: https://www.who.int/news
- World Bank News: https://www.worldbank.org/en/news

How Briefa will filter news:

- By country: Rwanda, Uganda, Kenya, Africa, global.
- By category: politics, business, technology, health, education, environment.
- By date and relevance.
- Remove duplicate stories and prioritize reliable sources.

AI role: AI will summarize each story into a few sentences, suggest its category, identify the main facts, and help users understand the news quickly. Each story will link to its original source.

2. Jobs

Data will come from these links:

- UN Careers: https://careers.un.org/
- UN jobs in Rwanda: https://rwanda.un.org/en/jobs
- World Bank Careers: https://www.worldbank.org/ext/en/careers
- African Union Careers: https://au.int/en/careers
- African Development Bank: https://www.afdb.org/en/about-us/careers
- Rwanda Development Board: https://rdb.rw/
- Rwanda Public Service Recruitment Portal: https://recruitment.mifotra.gov.rw/
- Impactpool: https://www.impactpool.org/

How Briefa will filter jobs:

- By country, city, remote or on-site.
- By job type: internship, entry-level, full-time, contract, volunteering.
- By field: IT, finance, health, education, engineering and others.
- By application deadline and employer.

AI role: AI will summarize the job, highlight required qualifications, experience, location and deadline, and help users find jobs matching their interests. Applications must link to the original employer or verified application page.

3. Scholarships

Data will come from these links:

- Chevening Scholarships: https://www.chevening.org/scholarships/
- DAAD Scholarships: https://www.daad.de/en/studying-in-germany/scholarships/
- Erasmus Mundus: https://erasmus-plus.ec.europa.eu/
- Commonwealth Scholarships: https://cscuk.fcdo.gov.uk/
- Mastercard Foundation: https://mastercardfdn.org/
- African Union: https://au.int/
- Study in Japan: https://www.studyinjapan.go.jp/en/
- EducationUSA: https://educationusa.state.gov/

How Briefa will filter scholarships:

- By study level: undergraduate, master's, PhD.
- By destination country and eligible nationality.
- By subject, funding type and eligibility requirements.
- By application deadline: open, closing soon, or closed.

AI role: AI will summarize the scholarship, explain who can apply, identify what funding is offered, list key requirements, and highlight the deadline. It must not invent eligibility details or funding amounts

4. Opportunities, Grants, and Fellowships

Data will come from these links:

- ReliefWeb: https://reliefweb.int/

- Africa No Filter Opportunity Hub: https://opportunity.africanofilter.org/

  

  Africa No Filter
- YouthConnekt Rwanda: https://youthconnekt.rw/opportunities/

  

  YouthConnekt-rwanda
- UN Economic Commission for Africa: https://www.uneca.org/about/opportunities
- UNESCO Youth Grants: https://www.unesco.org/en/youth/global-grant-scheme
- Open Opportunities — Rwanda: https://openopportunities.org/opportunities-country/rwanda/
- Youth Opportunities: https://youthopp.yifoss.org/
- UNHCR Rwanda: https://help.unhcr.org/rwanda/

How Briefa will filter opportunities:

- By country, applicant age, qualification and field.
- By opportunity type: grants, fellowships, training, competitions and volunteering.
- By funding amount, eligibility and deadline, where published.
- Remove duplicates and expired opportunities.

AI role: AI will explain the opportunity, who can apply, what benefits are offered, the required documents and the deadline. It will distinguish confirmed details from missing information.

5. Events

Data will come from these links:

- UN events in Rwanda: https://rwanda.un.org/en/events

  

  United Nations in Rwanda
- Eventbrite Kigali: https://www.eventbrite.com/d/rwanda--kigali-city/kigali/
- Visit Rwanda: https://www.visitrwanda.com/
- Rwanda Convention Bureau: https://rcb.rw/
- UNESCO Events: https://www.unesco.org/en/events
- World Bank Events: https://www.worldbank.org/en/events
- African Union: https://au.int/

- University and conference websites, using their official event announcements.

How Briefa will filter events:

- By country, city and online/in-person format.
- By date, event category and price, if available.
- By upcoming, happening soon and completed.
- Show event dates and countdowns; remove past events from upcoming listings.

AI role: AI will summarize what the event is about, who should attend, where it takes place, when it happens and how to register.

6. How AI will work across Briefa

For every section, AI will:

1. Create a short, clear summary from the original content.
2. Categorize the item automatically.
3. Extract dates, locations, eligibility and deadlines when available.
4. Help rank relevant and recent items.
5. Detect likely duplicates and flag questionable information.
6. Keep a link to the original source so users can verify details.

7. Technical implementation

- Backend: collect and normalize data from available APIs and RSS feeds.
- Database: store items, source links, dates, categories and deadlines.
- AI service: generate summaries and categorize content.
- Frontend: display live information in the existing Briefa design.
- Automatic updates: refresh sources on a schedule and mark expired items.
- Search and filters: allow users to find information by country, category, date and keywords.

8. How it will work

It will work like this:

1. Add the website link — e.g. `https://news.un.org/`
2. Briefa connects to the source using its API, RSS feed, or an approved method to access its content.
3. Fetch new content — titles, articles, dates, and links.
4. AI processes it — creates short summaries and assigns categories.

5. Filter the content — by country, topic, date, or category.
6. Display it on Briefa — with the summary and original article link.
7. Repeat automatically — check for new content on a schedule.

Important: Just pasting a link does not guarantee Briefa can extract content. The website must allow access, and some sites require an API or special setup.

9.live link

Where to get the links:

- YouTube Live: https://www.youtube.com/live
- TikTok Trending: https://ads.tiktok.com/business/creativecenter/
- TikTok LIVE: https://www.tiktok.com/live
- Instagram Reels: https://www.instagram.com/reels/
- Facebook Live: https://www.facebook.com/watch/
- Facebook Videos: https://www.facebook.com/
- X (Twitter) Live and trending posts: https://x.com/explore
- Twitch Live: https://www.twitch.tv/
- Kick Live: https://kick.com/

How it will work in Briefa:

1. Collect video links through official APIs and permitted embeds.
2. Identify popular videos using available engagement data.
3. Filter by platform, country, category, and live status.
4. Display videos with their original links.
5. Use AI to summarize and organize the content.

10.treding video

You can find short trending videos on these platforms for Briefa:

- TikTok: https://www.tiktok.com/explore
- Instagram Reels: https://www.instagram.com/reels/
- YouTube Shorts: https://www.youtube.com/shorts/
- Facebook Reels: https://www.facebook.com/reel/
- X (Twitter) videos: https://x.com/explore
- Snapchat Spotlight: https://www.snapchat.com/spotlight
- Reddit popular videos: https://www.reddit.com/r/popular/

How Briefa will use them

1. Collect available video links through official APIs or permitted embeds.

2. Identify popular videos using available engagement and trend data.
3. Categorize them by topic, country, and platform.
4. Display the original video link in Briefa.

My recommendation: Start with YouTube Shorts, TikTok, and Instagram Reels. Note that TikTok and Instagram do not provide unrestricted public APIs for collecting every trending video, so access depends on their permissions and policies
